# Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften)

*By Jean-Baptiste Hiriart-Urruty, Claude Lemarechal*

**Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften)** By Jean-Baptiste Hiriart-Urruty, Claude Lemarechal

Convex Analysis may be considered as a refinement of standard calculus, with equalities and approximations replaced by inequalities. As such, it can easily be integrated into a graduate study curriculum. Minimization algorithms, more specifically those adapted to non-differentiable functions, provide an immediate application of convex analysis to various fields related to optimization and operations research. These two topics making up the title of the book, reflect the two origins of the authors, who belong respectively to the academic world and to that of applications. Part I can be used as an introductory textbook (as a basis for courses, or for self-study); Part II continues this at a higher technical level and is addressed more to specialists, collecting results that so far have not appeared in books.

## Editorial Review

Review
From the reviews: "... The book is very well written, nicely illustrated, and clearly understandable even for senior undergraduate students of mathematics... Throughout the book, the authors carefully follow the recommendation by A. Einstein: 'Everything should be made as simple as possible, but not simpler.'"

## Users Review

**From reader reviews:**

**Donna Jost:**

The book Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften) make one feel enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can to become your best friend when you getting anxiety or having big problem using your subject. If you can make reading through a book Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften) to become your habit, you can get considerably more advantages, like add your own capable, increase your knowledge about several or all subjects. You may know everything if you like open and read a publication Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften). Kinds of book are several. It means that, science guide or encyclopedia or other individuals. So , how do you think about this guide?

**Sandra McLean:**

What do you consider book? It is just for students because they're still students or the idea for all people in the world, what best subject for that? Just simply you can be answered for that query above. Every person has several personality and hobby for every other. Don't to be pressured someone or something that they don't wish do that. You must know how great and important the book Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften). All type of book could you see on many options. You can look for the internet sources or other social media.

**Nicole Norris:**

Are you kind of hectic person, only have 10 or 15 minute in your morning to upgrading your mind skill or thinking skill also analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short time to read it because all this time you only find guide that need more time to be examine. Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften) can be your answer mainly because it can be read by you who have those short extra time problems.

**Suzanne Mitchell:**

This Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften) is completely new way for you who has interest to look for some information given it relief your hunger info. Getting deeper you into it getting knowledge more you know otherwise you who still having little digest in reading this Convex Analysis and Minimization Algorithms I: Fundamentals (Grundlehren der mathematischen Wissenschaften) can be the light food to suit your needs because the information inside that book is easy to get by means of anyone. These books develop itself in the form that is reachable by anyone, yes I mean in the e-book application form. People who think that in publication form make them feel tired even dizzy this book is the answer. So there is not any in reading a guide especially this one. You can find what you are looking for. It should be here for a person. So , don't miss it! Just read this e-book variety for your better life in addition to knowledge.
