The Extractive Metallurgy of Gold By John C. Yannopoulos

The history of gold begins in antiquity. Bits of gold were found in Spanish caves that were used by Paleolithic people around 40,000 B.C. Gold is the "child of Zeus," wrote the Greek poet Pindar. The Romans called the yellow metal aurum ("shining dawn"). Gold is the first element and first metal mentioned in the Bible, where it appears in more than 400 references. This book provides the most thorough and up-to-date information available on the extraction of gold from its ores, starting with the mineralogy of gold ores and ending with details of refining. Each chapter concludes with a list of references including full publication information for all works cited. Sources preceded by an asterisk (*) are especially recommended for more in-depth study. Nine appendices, helpful to both students and operators, complement the text. I have made every attempt to keep abreast of recent technical literature on the extraction of gold. Original publications through the spring of 1989 have been reviewed and cited where appropriate. This book is intended as a reference for operators, managers, and designers of gold mills and for professional prospectors. It is also designed as a textbook for extractive metallurgy courses. I am indebted to the Library of Engineering Societies in New York, which was the main source of the references in the book. The assistance of my son, Panos, in typing the manuscript is gratefully acknowledged.

Editorial Review

Review

‘Certainly this is more of a handbook than an all-embracing reatise but as such it is a first class and concise review of the processing of gold ores and should be particularly valuable to those on the periphery of mineral processing...a compulsory purchase for geologists, mineral economists, financial advisors and middle to senior management, as well as extractive metallurgists.’

International Liaison Group Gold Mineralization

Users Review

From reader reviews:

Jane Garner:

A lot of people always spent their particular free time to vacation or even go to the outside with them family members or their friend. Were you aware? Many a lot of people spent they free time just watching TV, or even playing video games all day long. If you would like try to find a new activity this is look different you can read a book. It is really fun in your case. If you enjoy the book which you read you can spent the whole day to reading a guide. The book The Extractive Metallurgy of Gold it is very good to read.
