The Road to Iraq: The Making of a Neoconservative War By Muhammad Idrees Ahmad

What were the causes of the Iraq War? Who were the main players? How was the war sold to the decision makers? Despite all that has been written on the Iraq war the myriad scholarly, journalistic and polemical works the answers to these questions remain shrouded in an ideological mist. *The Road to Iraq* is an empirical investigation that dispels this fog.

Discover how a small but ideologically coherent and socially cohesive group of determined political agents used the contingency of 9/11 to overwhelm a skeptical foreign policy establishment, military brass and intelligence apparatus.

Editorial Review

Review

"This forcefully argued and meticulously researched book turns out to be enormously relevant to the present moment ... Let me reiterate the enormous significance and relevance of *The Road to Iraq*. It is a work of tremendous intellectual diligence and moral seriousness. We are all indebted to Ahmad for undertaking this major contribution to the debate on one of the central events of this century, whose aftershocks continue to unfold daily, to disastrous effect. With the neocons poised to make a comeback, this book serves as a cautionary tale of bracing urgency. It is a must-read guide to the history of the present."--Danny Postel, Associate Director of the Center for Middle East Studies, University of Denver, in *The Drouth*

"Ahmad, who teaches journalism in the UK and writes for a variety of American and European publications, traces the remarkable history of neoconservatism in minute detail. He demonstrates its consistent role as the voice of cold-war thinking, segueing smoothly from militant anti-Communism of the era of Scoop Jackson (the 'Senator from Boeing') to the new opportunities afforded by Islamic fundamentalism since the 1990s."--James B. Rule, *Dissent*

"The Road to Iraq is one of the most insightful and instructive books for anyone wanting to know why the United States launched the Iraq War, one of the biggest blunders in the history of US foreign policy. The Road to Iraq is an illuminating read about one of the most disturbing episodes in recent US history. What the neocons did in hijacking US policy was the closest thing to a coup that the United States ever experienced, and this book does an excellent job of explaining how the coup-plotters pulled it off."--Paul R. Pillar, Center for Security Studies, Georgetown University, *International Journal of Middle East Studies*

About the Author

Muhammad Idrees Ahmad is a political sociologist and a Lecturer in Journalism at the University for the Creative Arts. His articles and essays have appeared in *The Atlantic*, *The New Republic*, *Al Jazeera*, *The National*, *Le Monde Diplomatique*, *Guernica*, *Adbusters*, *IPS News*, *Political Insight* and the *London Review of Books* blog.
