Histological Typing of Soft Tissue Tumours (WHO. World Health Organization. International Histological Classification of Tumours) By S.W. Weiss

The first edition of Histological Typing of Soft Tissue Tumours, published in 1969, represented a major step in the standardization of nomenclature in this specialty area. Accompanied by a glass slide set of more than a hundred common and exotic tumours, this book resulted in the rapid assimilation of a universal set of guidelines and diagnostic definitions by pathologists in many countries. In the intervening two decades numerous changes have occurred, and our committee has been challenged by the desire to incorporate new and exciting findings from the areas of immunohistochemistry and molecular biology into the classification with the need to develop a simple reproducible classification for practising pathologists. The current system, while based principally on standard microscopic observations, acknowledges and cites the use of diagnostically valuable ancillary techniques. Changes in the Classification Although the original classification utilized the concept of "histogenesis" or tissue of origin in defining tumours, we have departed from that point of view, acknowledging the impossibility of determining histogenesis by morphologic means alone. This classification is based on the "line of differentiation," or stated simply, by comparing tumours to the normal cell they most closely resemble without necessarily implying origin therefrom. As in the old classification we have interpreted the term "tumours" in the broadest sense of the word and have, therefore, included neoplastic and non-neoplastic conditions.

Editorial Review

Users Review

From reader reviews:

Della McDonald:

The book Histological Typing of Soft Tissue Tumours (WHO. World Health Organization. International Histological Classification of Tumours) can give more knowledge and also the precise product information about everything you want. Why then must we leave the great thing like a book Histological Typing of Soft Tissue Tumours (WHO. World Health Organization. International Histological Classification of Tumours)? A number of you have a different opinion about book. But one aim that book can give many data for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or data that you take for that, you can give for each other; you are able to share all of these. Book Histological Typing of Soft Tissue Tumours (WHO. World Health Organization. International Histological Classification of Tumours) has simple shape however you know: it has great and big function for you. You can search the enormous world by wide open and read a reserve. So it is very wonderful.

Robert Fox:

The reserve with title Histological Typing of Soft Tissue Tumours (WHO. World Health Organization. International Histological Classification of Tumours) includes a lot of information that you can understand it. You can get a lot of advantage after read this book. This particular book exist new know-how the information that exist in this book represented the condition of the world right now. That is important to you to know how the improvement of the world. This specific book will bring you within new era of the globalization. You can read the e-book in your smart phone, so you can read this anywhere you want.

Danielle Burdette:

A lot of people always spent their very own free time to vacation or even go to the outside with them family or their friend. Do you realize? Many a lot of people spent these people free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a new book. It is really fun for yourself. If you enjoy the book that you just read you can spent the entire day to reading a guide. The book Histological Typing of Soft Tissue Tumours (WHO. World Health Organization. International Histological Classification of Tumours) it is extremely good to read. There are a lot of people that recommended this book. These were enjoying reading this book. If you did not have enough space to deliver this book you can buy often the e-book. You can more very easily to read this book from a smart phone. The price is not to fund but this book features high quality.
