Mastering jBPM6 By Simone Fiorini, Arun V Gopalakrishnan

Design, build, and deploy business process-centric applications using the cutting-edge jBPM technology stack

About This Book

- Customize and extend the jBPM tools to integrate them into your existing solution/technology architecture
- Understand the core components of jBPM, including topics such as KIE API, RuntimeManager, KieSession, and KieBase
- Follow real-world illustrations that will help you achieve objectives using screenshots and code snippets

Who This Book Is For

If you are a designer or developer who wants to build and operate business process-centric applications, then this book is for you. Knowledge of the basic concepts of application development in Java will be helpful in following the concepts covered in the book, but is not necessary.

What You Will Learn

- Understand the jBPM tool stack and business process management systems, the standards, patterns, and use cases
- Build your first BPM application using the jBPM tool stack
- Monitor and manage the daily operations of business process-centric applications
- Get a detailed explanation of all the BPMN constructs supported by jBPM
- Understand the core architecture of jBPM
- Learn about the extension points and pluggable mechanisms which would help you to extend jBPM core
- Enhance your application with business process management functionalities by integrating jBPM into your existing application portfolio
- Configure the jBPM-based application to meet the non-functional requirements in production

- Integrate jBPM to the JEE, SOA, and EDA environments to use its capabilities

In Detail

This book provides a complete understanding of the jBPM technology stack. It starts with an introduction to the world of business process management systems, the problem domain addressed by jBPM, explores the main use cases that can be addressed by business process management systems, and illustrates the main design patterns. It takes you through the details of the architecture and available out-of-the-box provisions for customizing, extending, and integrating the features of jBPM to meet the requirements of your application. Moreover, this book will empower you with the knowledge to integrate jBPM with enterprise architecture, debug through the source code of jBPM, and utilize the flexibility provided by a heavily modular system. Finally, it introduces you to the provisions available for a jBPM-based application to put the non-functional characteristics of the system, which are of great importance when we deploy our application in production. The book helps you in putting the knowledge at work by providing you with a lot of ready to use examples, both basic and advanced ones.

Editorial Review

About the Author

Simone Fiorini

Simone Fiorini is a seasoned professional with 20 years of software development experience, specializing in large-scale software systems, mission critical applications, and project management in a wide variety of computing environments and platforms, with a focus on EAI, BPM, and integration-oriented tools. His latest efforts are focused on an online reservation system for a large Middle East railway company and a scalable, reactive, financial market data server for a leading Italian banking group's investment bank. A graduate of both Universita di Parma (earth science) and University of Milan (engineering of computing systems), Simone resides near Brescia, where he's trying to grow roses and other fragrant flowers for his wife, Giuliana, and their two sons.

Arun V Gopalakrishnan

Arun V Gopalakrishnan has more than 9 years of experience in creating architecture, designing, and developing enterprise applications used in the domains of BFSI, supply chain management, and telecom businesses. He graduated as a bachelor of technology in electronics and communications and holds a master's degree in software systems. Currently, he is playing the role of a software architect in designing and developing an enterprise middleware platform. He is well versed in service-oriented, event-driven architectures and has experience in integrating jBPM with enterprise architecture. He is passionate about learning new technologies and improving his knowledge base and expertise in JEE, OOAD, SOA, EDA, expert systems, and distributed computing. Along with this technical expertise, he enjoys engineering software applications and is an avid follower, practitioner, and mentor of agile and continuous delivery models. He believes in tools and is well versed in creating, using, and extending DevOps tools, such as Eclipse, Maven, Git, Gerrit, Jenkins, Sonar, JIRA, and MediaWiki, to enhance the efficiency of development teams.

Users Review

From reader reviews:

Jack Cluck:

Do you have favorite book? Should you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each guide has different aim or goal; it means that book has different type. Some people experience enjoy to spend their the perfect time to read a book. These are reading whatever they acquire because their hobby will be reading a book. What about the person who don't like looking at a book? Sometime, man or woman feel need book once they found difficult problem or maybe exercise. Well, probably you will need this Mastering jBPM6.

Theodore Stewart:

What do you concerning book? It is not important to you? Or just adding material when you need something to explain what yours problem? How about your spare time? Or are you busy individual? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? All people has many questions above. They should answer that question since just their can do that. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on guardería until university need that Mastering jBPM6 to read.

Jennifer Crowe:

Information is provisions for anyone to get better life, information presently can get by anyone in everywhere. The information can be a know-how or any news even restricted. What people must be consider while those information which is from the former life are challenging to be find than now is taking seriously which one is appropriate to believe or which one often the resource are convinced. If you get the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen throughout you if you take Mastering jBPM6 as your daily resource information.

Rita Lattimore:

Playing with family in a very park, coming to see the ocean world or hanging out with good friends is thing that usually you could have done when you have spare time, in that case why you don't try point that really opposite from that. One particular activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love Mastering jBPM6, you could enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't obtain it, oh come on its identified as reading friends.
