Markus Zirn is a Senior Director of Product Management for Oracle Fusion Middleware. In this role he heads the Strategic Customer Program, where he works with Oracle's leading and most innovative middleware customers. He has been part of the Enterprise Software industry for more than 10 years, including roles as Vice President of Product Marketing and part of the founding team of QUIQ and as a Management Consultant of Booz Allen & Hamilton's Silicon Valley High Tech Practice. Markus' passion for Service-Oriented Architecture (SOA) and BPEL stems both from practical experience designing and optimizing business processes as part of process reengineering projects and from being part of the advent of "software as a service" before web services became mainstream. He holds a Masters of Electrical Engineering from the University of Karlsruhe and is an alumnus of the Tripartite program, a joint European degree from the University of Karlsruhe, Germany, the University of Southampton, UK, and ESIEE, France.

Harish Gaur has more than 10 years of experience in the enterprise software industry. He is currently the Group Product Manager for Fusion Middleware at Oracle. In his current role, he works closely with strategic customers implementing Service-Oriented Architecture using Oracle SOA technology. Harish's expertise in Service-Oriented Architecture (SOA) draws from an extensive hands-on experience with Business Process Management (BPM) and Enterprise Application Integration (EAI).

About the Author
Arun Poduval works as a Technical consultant at Midwave Corporation specialized in SOA/Middleware. Doug Todd is CTO of Enterra Solutions in Yardley, PA. He has more than 20 years of experience in systems architecture, applications architecture, systems integration, and applications integration with major corporations. Todd is responsible for Enterra's overall IT strategy and tactical implementation, enterprise information architecture, and technology product offerings. Doug Todd worked on Chapter 5. Harish Gaur has more than 13 years of experience in the enterprise software industry including 7+ years at Oracle. He is currently the Director of Product Management for Fusion Middleware at Oracle. In his current role, he works closely with strategic customers implementing SOA & BPM using Oracle Fusion Middleware. He is co-author of BPEL Cookbook (2007) and Fusion Middleware Patterns (Sept 2010) Before Oracle, he worked as a Solution Specialist with Vitria Technology educating customers about the benefits of Business Process Management. Prior to that, he helped Fortune 500 companies architect scalable integration solutions using EAI tools like webMethods and CrossWorlds (now IBM). Harish holds an engineering degree in Computer Science and is an MBA from Haas School of Business, UC Berkeley.

Users Review

From reader reviews:

Pamela Bradley:

Now a day people that Living in the era where everything reachable by match the internet and the resources in it can be true or not require people to be aware of each data they get. How a lot more to be smart in getting any information nowadays? Of course the solution is reading a book. Reading through a book can help folks out of this uncertainty Information mainly this BPEL Cookbook: Best Practices for SOA-based integration and composite applications development book because book offers you rich details and knowledge. Of course the data in this book hundred pct guarantees there is no doubt in it you know.

Dedra Clark:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their own friends. Usually they undertaking activity like watching television, gonna beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Can be reading a book is usually option to fill your free time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to attempt look for book, may be the guide untitled BPEL Cookbook: Best Practices for SOA-based integration and composite applications development can be fine book to read. May be it can be best activity to you.

Chad Smith:

As a scholar exactly feel bored for you to reading. If their teacher questioned them to go to the library or even make summary for some guide, they are complained. Just small students that has reading's internal or real their leisure activity. They just do what the professor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore , this BPEL Cookbook: Best Practices for SOA-based integration and composite applications development can make you truly feel more interested to read.

Charles Wagoner:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from the book. Book is prepared or printed or descriptive from each source in which filled update of news. On this modern era like right now, many ways to get information are available for you actually. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your understanding by that book. Ready to spend your spare time to spread out your book? Or just searching for the BPEL Cookbook: Best Practices for SOA-based integration and composite applications development when you necessary it?
