From the Publisher

"A wonderful work that shows how reasoning is challenging, yet engaging, rewarding and fun. Because reasoning involves people, it is an art as well as a science. And to remind ourselves just why it's not always easy to mix the two, we owe a cheerful salute to Nobel prize-winning physicist Murray Gell-Mann who observed: 'Think how hard physics would be if particles could think.'" --**Dr. William A. McEachern, author, award-winning teacher, and founding editor of The Teaching Economist**
