Wittgenstein and the Philosophy of Mind From Oxford University Press

Philosophical questions about the mind preoccupied much of Wittgenstein's later writing, and his contribution to them is deep and wide-ranging, bearing upon philosophical issues concerning sense-experience, concept formation, perception, introspection, the science of psychology, aspect perception, the self, the understanding of rules, the relation between mind and brain, artificial intelligence, and many other subjects of current concern. According to a growing number of eminent philosophers, however, many of Wittgenstein's most important insights still have not been properly absorbed by contemporary philosophical debates on these topics. In anything, work on these subjects is less informed by Wittgenstein's examples and discussions than ever before. In this volume, philosophers from inside and outside of Wittgensteinian circles explore Wittgenstein's treatment of philosophical questions about the mind and issues in contemporary philosophy of mind upon which Wittgenstein's philosophy may have significance. Bringing to bear their broad range of perspectives on his philosophy, these philosophers collectively demonstrate its fundamental import for present-day philosophy of mind.

Editorial Review

Review

"This collection brings together first-rate interpretative essays that exhibit the import of Wittgenstein's philosophy for general philosophical issues and especially for fundamental questions in the philosophy of mind, and equally good essays in the philosophy of mind, written with full awareness of many of the most important insights in Wittgenstein. Philosophers of mind and Wittgenstein scholars will benefit much from a close reading of these essays. Moreover, the book should be of great interest to all philosophers. It is a major contribution that will be of lasting value."--Olav Gjelsvik, *Notre Dame Philosophical Reviews*

About the Author

Jonathan Ellis is Associate Professor of Philosophy at the University of California ,Santa Cruz. He received his Ph.D. at the University of California, Berkeley (2002). He works primarily in the fields of epistemology, philosophy of mind, and philosophy of psychology.
