An Ethnohistorical Dictionary of the Russian and Soviet Empires By James Stuart Olson

In 1991, the centrifugal forces of ethnic nationalism destroyed the Soviet Union. Religious and ethnic issues will be the defining principles of political life in East Europe, Transcaucasia, and Central Asia for the next decade. Yet when most Americans and Europeans read, for instance, of the Ossetians and Ingush, they have no idea who these peoples are or why they are fighting. This volume will provide a ready reference for students, researchers, and librarians who are trying to sort out the political and social struggles in that part of the world. Focusing on ethnolinguistic groups rather than peoples with purely religious orientations, Olson provides entries on over 450 ethnic groups, with appropriate cross-references. Each entry concludes with references, and the volume includes a selected bibliography of English-language titles. The volume also includes a chronology, several appendixes providing statistical information, and an appendix essay on Islam in Russia and the Soviet Union.

Editorial Review

Review

"When one reads of the dislocations from their land, armed conflict and conquest, and the systemic oppression that some peoples have endured, it comes as no surprise that in the power vacuum caused by the collapse of the Soviet Union, ancient rivalries have surfaced and threaten to fracture further an already fractured empire. As those conflicts attract more and more attention in the West, this dictionary will become more important as a sound, accessible source of information about the groups, their grudges, and their aspirations."-Wilson Library Bulletin

"A well written dictionary that all collections supporting research on Russia or the Soviet Union will want to purchase."- Reference Book Review

... "a highly useful source for overviews of the various ethnic groupings and identifying English-language sources dealing with the issue. Recommended for academic libraries supporting Russian Studies programs."-Choice
