Handbook of Tibetan Iconometry: A Guide to the Arts of the 17th Century (Brill's Tibetan Studies Library) From Brill Academic Pub

The *Handbook of Iconometry* (Tibetan title: Cha tshad kyi dpe ris Dpyod ldan yid gsos) constitutes a lavishly illustrated treatise laying down the iconometric principles and measurements at the heart of the 17th-century art of Tibet. The book was produced in ca. 1687 at the instigation of the famous scholar and statesman sde srid Sangs rgyas rgya mtsho (1653-1705). Today, the original is kept in the Tibet Autonomous Region Archives (Lhasa). The *Handbook* includes more than 150 meticulously prepared drawings of buddhas, bodhisattvas and divinities, 70 script types and 14 stupa models all extrapolated from the rich heritage of Indo-Tibetan Buddhist art. These are accompanied by an introduction charting the production of the *Handbook* in the 17th century and the scholarly profile of its principal author Sangs rgyas rgya mtsho. In the appendix, it reproduces passages from the Vai urya g.Ya' sel that provide valuable additional information about the illustrations."

Editorial Review

Review

'the work so well reproduced in the present volume must henceforth serve as a veritable *pierre de touche*. In some three hundred precise illustrations, we find here a detailed catalogue of iconometric standards, including divinities of all types, their attributes, stupas and other architectural details, and, most interestingly, less well known aspects of Tibetan iconometrical convention including rare styles of calligraphic script. All of this merits close study in relation both to textual sources and evidence of actual artistic practice. (...) admirably high quality of the reproduction of the manuscript itself (...) a virtual substitute for the original text. The publisher, Brill in Leiden, must be congratulated.' Matthew T. Kapstein, *Arts Asiatiques*, 68 (2013)
