Neuropsychological Rehabilitation: Theory, Models, Therapy and Outcome

By Barbara A. Wilson OBE, Fergus Gracey, Jonathan J. Evans, Andrew Bateman

The aim of neuropsychological rehabilitation is to enable people with cognitive, emotional, or behavioural deficits to achieve their maximum potential in the domains of psychological, social, leisure, vocational or everyday functioning. Describing the holistic programme devised and adopted at the world famous Oliver Zangwill Centre and embracing a broad theoretical base, incorporating a variety of frameworks, theories and models, this book proposes an integrated approach to brain injury rehabilitation by an interdisciplinary team. The coverage explains the underlying principles involved, describes the group therapies employed, highlights a selection of real case examples and reviews the outcomes measured and achieved. This book is essential reading for clinical neuropsychologists, clinical psychologists, speech and language therapists, occupational therapists, psychiatrists, neurologists, physiotherapists, social workers and nurses.

Editorial Review

Review

"Overall, this is a helpful book for practical rehabilitation techniques and structuring programs. Readers already working in this field will relate to the case examples and glean important strategies from them."

--Doody's Review Service
