### Editorial Review

#### From the Back Cover

Web services allow new and improved ways for enterprise applications to communicate and integrate with each other over the Web and, as such, are having a profound effect on both the worlds of business and of software development.

The new edition of this bestselling book offers a comprehensive and up to date treatment of web services and Service Oriented Architecture (SOA), giving you all you need to know to gain a solid foundation in this area. Building upon the clear, accessible approach of the first edition, it provides a complete introduction to the concepts, principles, technology and standards of web services. The book also provides an in depth examination of good design and development practises for SOA applications in organisations.

#### Key features:

- A spiral approach to instruction helps readers build on and reinforce basic knowledge as the topics become more advanced.
- Numerous examples which demonstrate the practical application of the theory are included.
- Self-test questions, hints, tips and discussion topics feature throughout the book to support self-directed learning.

#### New to this edition:

- Two new chapters have been added on SOA modelling and Cloud Computing technology.
- A comprehensive real-life case study containing numerous practical examples has been integrated and referenced throughout the entire book to give readers 'hands-on' insight into applying theory to practice, and enhance understanding of the key concepts.
- Business Process Modelling Notation (BPMN), which is rapidly becoming an industry standard, is used throughout the book.
- Discussion of software engineering issues related to implementing sound SOA applications is included.
- Description of new standards, such as BPEL v2.0 is discussed.
- A Companion Website ([www.pearsoned.co.uk/papazoglou](http://www.pearsoned.co.uk/papazoglou)) offers detailed coding solutions available to download.

*Web Services & SOA: Principles and Technology* is an indispensable complete reference for IT-minded students and for professionals alike.

**Michael P. Papazoglou** is a senior Professor at Tilburg University, The Netherlands, where he is the Executive Director of the European Research Institute in Service Science (ERISS) and the Scientific Director of the European Network of Excellence in Software Services and Systems (S-Cube).

## **Users Review**

### **From reader reviews:**

#### **Dorothy Guillen:**

What do you concentrate on book? It is just for students because they are still students or it for all people in the world, the actual best subject for that? Simply you can be answered for that problem above. Every person has different personality and hobby for each other. Don't to be forced someone or something that they don't need do that. You must know how great and important the book Web Services & SOA: Principles & Technology, 2nd ed.. All type of book are you able to see on many resources.
