Anticancer: A New Way of Life By David Servan-Schreiber

The revolutionary *New York Times* bestseller about powerful lifestyle changes that can fight and prevent cancer—an integrative approach based on the latest research

An international phenomenon, *Anticancer* has been a long-running bestseller in the U.S. since Viking first published it in fall 2008. Now, this updated edition draws on the most recent clinical studies and offers more tips on how people living with cancer can fight it and how healthy people can prevent it. The new edition of *Anticancer* includes:

- More benefits of anticancer foods, including new alternatives to sugar and cautions about some that are now on the market
- New information about how vitamin D strengthens the immune system
- Warnings about common food contaminants that have recently been proven to contribute to cancer progression
- A new chapter on mind-body approaches to stress reduction, with recent studies that show how our reactions to stress can interfere with natural defenses and how friendships can support healing in ways never before understood
- A groundbreaking study showing that lifestyle modification, as originally proposed in *Anticancer*, reduces mortality for breast cancer by an astounding 68 percent after completion of treatment
- New supporting evidence for the entire *Anticancer* program

Editorial Review

Review

“A common-sense blueprint for healthy living.”

—*Chicago Tribune*

“Fills an important gap in our knowledge of how patients can contribute to their own care by supplementing conventional medical treatment. I recommend this book to anyone interested in preventive medicine and integrated, complementary approaches to patient care.”

—**John Mendelsohn, MD, president, MD Anderson Cancer Center, University of Texas**

“Resonating with cancer support communities . . . and recommended nationwide on internet message boards.”

—*Los Angeles Times*

“Life affirming . . . filled with practical advice that enables cancer patients to overcome their initial feelings of helplessness and to adopt a proactive attitude of survivorship.”

—*The Seattle Times*

“Servan-Schreiber’s writing offers much more than science. It is full of passion . . . and compassion for his patients dealing with the emotional aspects of serious or terminal illness.”

—*Pittsburgh Post-Gazette*

“Enormously compelling evidence and arguments for participating in our own health by supporting our deep natural capacity for healing. Everybody should read this book and enact its simple but potentially lifesaving recommendations.”

—**Jon Kabat-Zinn, PhD, author of *Wherever You Go, There You Are***

“*Anticancer*’s message is optimistic, the advice scientifically sound, and the prose highly readable.”

—*Fort Worth Star-Telegram*

“Presents a compelling combination of one doctor’s story of his battle with cancer along with his research into how to fight the disease . . . Readable and moving.”

—*Body & Soul Magazine*

About the Author

David Servan-Schreiber, MD, PhD, was a clinical professor of psychiatry at the University of Pittsburgh School of Medicine and cofounder of the Center for Integrative Medicine. He codirected an NIH laboratory for the study of cognitive neuroscience and published more than ninety articles in scientific journals. His pioneering book *Anticancer: A New Way of Life* became an international bestseller and was translated into more than forty languages. He is also the author of *The Instinct to Heal* and *Not the Last Goodbye*. Following a yearlong battle with a relapse of brain cancer, Servan-Schreiber died in July 2011.

Foods That Act Like Medications

From *ANTICANCER: A New Way of Life* by David Servan-Schreiber, MD, PhD

Foods That Act Like Medications

If certain foods in our diet can act as fertilizers for tumors, others, to the contrary, harbor precious anticancer molecules. As recent discoveries show, these go far beyond the usual vitamins, minerals, and antioxidants.

In nature, when confronted with aggression, vegetables can neither fight nor flee. To survive, they must be armed with powerful molecules capable of defending them against bacteria, insects, and bad weather. These molecules are phytochemical compounds with antimicrobial, antifungal, and insecticide properties that act on the biological mechanisms of potential aggressors. They also have antioxidant properties that protect the plant's cells from dampness and the sun's rays (by preventing cellular "rust" from forming when the cell's fragile mechanisms are exposed to the corrosive effects of oxygen).

Plums, Peaches, and Nectarines: It's Time for Stone Fruit

Berries have recently found some competition: peaches, plums, nectarines, etc. (collectively known as stone fruit), whose anticancer virtues were previously unknown. According to a group of researchers in Texas who reviewed more than a hundred species, these fruits—particularly plums—are at least as rich in anticancer elements as small berries. In this time of economic recession, it's good to know that a single plum contains as many antioxidants as a handful of berries and costs far less. In laboratory tests, stone fruits have also demonstrated their efficacy against breast cancer cells and cholesterol.

Probiotics

The intestines ordinarily contain "friendly" bacteria, which help digestion and facilitate regular bowel movements. They also play an important stabilizing role for the immune system. Among the most common of these bacteria are *Lactobacillus acidophilus* and *Lactobacillus bifidus*.

It has been demonstrated that these probiotics inhibit the growth of colon cancer cells. Their effect on the facilitation of bowel movements also lowers the risk of colon cancer by reducing the time the intestines are exposed to carcinogenic substances in food. Probiotics thus also play a role in detoxification. In addition, according to a 2006 Korean study, probiotics improve the performance of the immune system, as well as increasing the number of NK cells. Organic yogurts and kefir are good sources of probiotics. Soy yogurts are usually enriched with probiotics. These precious bacteria are also found in sauerkraut and kimchi. Finally, certain foods are prebiotics, which means they contain polymers of fructose, which stimulate the growth of probiotic bacteria. Examples are garlic, onions, tomatoes, asparagus, bananas, and wheat.

Green Tea

Rich in polyphenols, including catechins (and particularly epigallocatechin gallate-3, or EGCG), which reduce the growth of the new vessels needed for tumor growth and metastases. It is also a powerful antioxidant and detoxifier (activating enzymes in the liver that eliminate toxins from the body), and it facilitates the death of cancer cells by apoptosis. In the laboratory, it enhances the effects of radiotherapy on cancer cells.

Turmeric and Curry

Turmeric (the yellow powder that is one of the components of yellow curry) is the most powerful natural anti-inflammatory identified today. It also helps stimulate apoptosis in cancer cells and inhibit angiogenesis. In the laboratory, it enhances the effectiveness of chemotherapy and reduces tumor growth.

Take note: To be assimilated by the body, turmeric must be mixed with black pepper (not simply with

peppers). Ideally, it must also be dissolved in oil (olive, canola, or linseed oil, preferably). In store-bought curry mixes, turmeric represents only 20 percent of the total. So it's better to obtain turmeric powder directly.

Recommendations for use: Mix $\frac{1}{4}$ teaspoon of turmeric powder with $\frac{1}{2}$ tablespoon of olive oil and a generous pinch of black pepper. Add to vegetables, soups, and salad dressings. A few drops of agave nectar can remove the slightly bitter taste.

Ginger

Ginger root also acts as a powerful antiinflammatory and an antioxidant (more effective than vitamin E, for example) and has protective effects. It acts against certain cancer cells. Moreover, it helps reduce the creation of new blood vessels. A ginger infusion tea also helps alleviate nausea from chemotherapy or radiotherapy.

Recommendations for use: Add grated ginger to a vegetable mix while it is cooking in a wok or frying pan. Or marinate fruits in lime juice and grated ginger (a touch of agave nectar may be added for those who prefer more sweetness). Make an infusion by cutting a small piece of ginger (about an inch) into slices and steeping in boiling water for ten to fifteen minutes. Can be drunk hot or cold.

Cruciform Vegetables

Cabbages (brussels sprouts, bok choy, Chinese cabbage, broccoli, cauliflower, etc.) contain sulforaphane and indole-3-carbinols (I3Cs), which are powerful anticancer molecules. Sulforaphane and I3Cs are capable of detoxifying certain carcinogenic substances. They prevent precancerous cells from developing into malignant tumors. They also promote the suicide of cancer cells and block angiogenesis. In 2009, at the Cancer Research Center of the University of Pittsburgh, biologist Dr. Shivendra Singh and his team studied the impact of sulforaphane—an antioxidant contained in cruciform vegetables—on prostate cancer in mice.

They made two radical new discoveries. First, consumption of sulforaphane three times a week considerably increases the action of NK cells against tumors (by more than 50 percent). Second, tumor-carrying rats that consumed sulforaphane were shown to have half as much risk of developing metastases as those that did not.

Take note: Avoid boiling cabbage and broccoli. Boiling risks destroying sulforaphane and I3Cs.

Recommendations for use: Cover and steam briefly or stir-fry rapidly in a wok with a little olive oil.

Users Review

From reader reviews:

Mario Berry:

The book *Anticancer: A New Way of Life* makes you feel enjoy for your spare time. You can utilize to make your capable far more increase. Book can be your best friend when you getting anxiety or having big problem using your subject. If you can make examining a book *Anticancer: A New Way of Life* to get your habit, you can get more advantages, like add your own personal capable, increase your knowledge about some or all subjects. You are able to know everything if you like start and read a guide *Anticancer: A New Way of Life*. Kinds of book are several. It means that, science publication or encyclopedia or others. So, how do you think about this book?

Lorenzo McAvoy:

The feeling that you get from Anticancer: A New Way of Life will be the more deep you rooting the information that hide in the words the more you get thinking about reading it. It doesn't mean that this book is hard to know but Anticancer: A New Way of Life giving you buzz feeling of reading. The author conveys their point in particular way that can be understood by means of anyone who read the item because the author of this reserve is well-known enough. This specific book also makes your personal vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We propose you for having that Anticancer: A New Way of Life instantly.

Mary James:

Playing with family in a very park, coming to see the water world or hanging out with close friends is thing that usually you might have done when you have spare time, subsequently why you don't try matter that really opposite from that. One activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Anticancer: A New Way of Life, you could enjoy both. It is very good combination right, you still want to miss it? What kind of hang type is it? Oh occur its mind hangout fellas. What? Still don't buy it, oh come on its called reading friends.

Lisa Thomason:

Are you kind of occupied person, only have 10 or even 15 minute in your morning to upgrading your mind expertise or thinking skill also analytical thinking? Then you are having problem with the book when compared with can satisfy your limited time to read it because this time you only find e-book that need more time to be go through. Anticancer: A New Way of Life can be your answer since it can be read by anyone who have those short extra time problems.
