From the Back Cover

Essential Mathematics for Economic Analysis, third edition

The market leading European text*, Essential Mathematics for Economic Analysis,* third Edition, continues to provide an invaluable introduction to the mathematical tools that undergraduate economists need

New to this edition:

·   *New:* Economic concepts, definitions and topics covered in the book are listed on the inside front cover.

·   *New:* Short answers to almost all of the more than 1000 problems in the book for students to self check.

·   *New* Students Manual with extended worked answers to selected problems in the book.

• *New* sections on elementary differential equations and difference equations included in this volume for the first time.

·   *New* and improved figures in colour for the first time.

• *New Instructor's Manual* now contains a large range of additional supplementary problems, simple to advanced, suitable for use in examinations.

Knut Sydsæter is an Emeritus Professor of Mathematics in the Economics Department at the University of Oslo, where, since 1965, he has had extensive experience in teaching mathematics for economists. He has also given graduate courses in dynamic optimization at Berkeley and Gothenborg. He has written and co-authored a number of books, of which several have been translated into many languages. In recent years he has been engaged in an attempt to improve the teaching of mathematics for economists in several African universities.

Peter Hammond is currently the Marie Curie Professor of Economics at the University of Warwick, where he moved in 2007 after becoming an Emeritus Professor at Stanford University. During the 1970s he was a Lecturer, then Professor in Economics at the University of Essex. He completed a BA in Mathematics and a PhD in Economics at the University of Cambridge. He has been an editor of the Review of Economic Studies, of the Econometric Society Monograph Series, and has served on the editorial boards of Social Choice and Welfare and the Journal of Public Economic Theory. He has published more than 100 academic papers in journals and books, mostly on economic theory and mathematical economics.

'The book is by far the best choice one can make for a course on mathematics for economists. It is exemplary in finding the right balance between mathematics and economic examples.'

Dr. Roelof J. Stroeker, Erasmus University, Rotterdam.

'I have long been a fan of these books, most books on Maths for Economists are either mathematically unsound or very boring – or both! Sydsaeter & Hammond certainly do not fall into either of these categories.'

Ann Round, University of Warwick
