Forensic Fire Scene Reconstruction (2nd Edition) By David J. Icove Ph.D. PE, John D. De Haan

Completely updated in a new edition, this book remains the best resource for a thorough understanding of fire dynamics, describing and illustrating a totally new systematic approach for reconstructing fire scenes. The approach applies the following principles of fire protection engineering along with forensic and behavioral science: identifiable fire pattern damage, human factors, physical forensic evidence of human activity, and application of the scientific method based upon relevant scientific principles and research. Using historical fire cases, the expert authors provide new information and insight into the ignition, growth, development, and outcome of those fires.

Editorial Review

From the Back Cover

Containing the most up-to-date information, the second edition of Forensic Fire Scene Reconstruction expands the ability of investigators to apply fire engineering, forensic analysis and the interpretation of human behavior to the accurate investigation of fires. Extensive new research on fire behavior, ignition mechanisms, fire patterns and fire modeling is incorporated to explore and explain the process of applying the full spectrum of forensic techniques to the reconstruction of fire events. With more than 70 years of combined experience, two of the most experienced fire scientists in the United States have authored a text that can be used by fire and law enforcement investigators, prosecutors, forensic scientists, and fire protection specialists. A greatly expanded peer review adds a newer fresh perspective to this edition.

About the Author

David J. Icove, PhD., PE, CFEI is an internationally recognized forensic fire engineering expert with more than 35 years of experience. Dr. Icove has served as a principal member of the NFPA 921 Technical Committee on Fire Investigations, and is the author of numerous publications and articles. As a retired career federal law enforcement agent, Dr. Icove served as a criminal investigator on the federal, state and local levels. He is a Certified Fire and Explosion Investigator (CFEI). Dr. Icove holds BS and MS degrees in Electrical Engineering and a PhD in Engineering Science and Mechanics from the University of Tennessee. Dr. Icove also holds a BS degree in Fire Protection Engineering from the University of Maryland-College Park. He is presently Adjunct Assistant Professor in the Department of Electrical and Computer Engineering at the University of Tennessee-Knoxville; serves on the faculty of the University of Maryland's Professional Master of Engineering in Fire Protection; and is a Registered Professional Engineer in Tennessee and Virginia.

John D. DeHaan, PhD, FABC, CFI, CFEI, FFSS, FSSDip is an internationally recognized forensic science expert, and author of Kirk's Fire Investigation, the leading textbook in the field of fire and arson investigation. He is also a former principal member of the NFPA 921 Technical Committee on Fire Investigations.

Dr. DeHaan has been a criminalist for more than 37 years and has gained considerable expertise in fire and explosion evidence as well as human hair, shoe print, and instrumental analysis and crime scene reconstruction. Dr. DeHaan holds a BS in Physics from the University of Illinois-Chicago, and was awarded a PhD in Pure and Applied Chemistry (Forensic Science) by Strathclyde University, Scotland. Dr. DeHaan is a Fellow of the American Board of Criminalists (Fire Debris), A Fellow of the Forensic Fire Society (UK), and holds Diplomas in Fire Investigation from the Forensic Fire Society and the Institution of Fire Engineers and a Certified Fire Investigator certification from the International Association of Arson Investigators. He is also a Certified Fire and Explosion Investigator from the National Association of Fire Investigators.

Users Review

From reader reviews:

Dirk Sullivan:

This Forensic Fire Scene Reconstruction (2nd Edition) book is not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book will be information inside this guide incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. This Forensic Fire Scene Reconstruction (2nd Edition) without we know teach the one who looking at it become critical in considering and analyzing. Don't be worry Forensic Fire Scene Reconstruction (2nd Edition) can bring if you are and not make your case space or bookshelves' turn into full because you can have it in the lovely laptop even mobile phone. This Forensic Fire Scene Reconstruction (2nd Edition) having fine arrangement in word and also layout, so you will not sense uninterested in reading.

Leslie Heidelberg:

Now a day people who Living in the era where everything reachable by connect with the internet and the resources inside it can be true or not need people to be aware of each data they get. How many people to be smart in getting any information nowadays? Of course the reply is reading a book. Studying a book can help people out of this uncertainty Information mainly this Forensic Fire Scene Reconstruction (2nd Edition) book because this book offers you rich info and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it you probably know this.

Elvis Quinlan:

Hey guys, do you really wants to finds a new book to study? May be the book with the name Forensic Fire Scene Reconstruction (2nd Edition) suitable to you? The actual book was written by well known writer in this era. The actual book untitled Forensic Fire Scene Reconstruction (2nd Edition)is one of several books which everyone read now. This specific book was inspired many men and women in the world. When you read this e-book you will enter the new dimensions that you ever know prior to. The author explained their plan in the simple way, therefore all of people can easily to understand the core of this guide. This book will give you a large amount of information about this world now. In order to see the represented of the world in this book.

Clarence Cavins:

Within this era which is the greater particular person or who has ability in doing something more are more special than other. Do you want to become one among it? It is just simple approach to have that. What you must do is just spending your time not very much but quite enough to enjoy a look at some books. Among the books in the top record in your reading list is definitely Forensic Fire Scene Reconstruction (2nd Edition). This book and that is qualified as The Hungry Hillsides can get you closer in turning out to be precious person. By looking upward and review this book you can get many advantages.
