Participatory Action Research: Theory and Methods for Engaged Inquiry

By Jacques M. Chevalier, Daniel J. Buckles

This book addresses a key issue in higher learning, university education and scientific research: the widespread difficulty researchers, experts and students from all disciplines face when trying to contribute to change in complex social settings characterized by uncertainty and the unknown. More than ever, researchers need flexible means and grounded theory to combine people-based and evidence-based inquiry into challenging situations that keep evolving and do not lend themselves to straightforward technical explanations and solutions.

In this book, the authors propose innovative strategies for engaged inquiry building on insights from many disciplines and lessons from the history of Participatory Action Research (PAR), including French psychosociology. The ongoing evolution of PAR has had a lasting legacy in fields ranging from community development to education, public engagement, natural resource management and problem solving in the workplace. All formulations have in common the idea that research must be done 'with' people and not 'on' or 'for' people. Inquiry of this kind makes sense of the world through efforts to transform it, as opposed to simply observing and studying human behaviour and people's views about reality, in the hope that meaningful change will happen somewhere down the road.

The book contributes many new tools and conceptual foundations to this longstanding tradition, grounded in real-life examples of collective fact-finding, analysis and decision-making from around the world. It provides a modular textbook on participatory action research and related methods, theory and practice, suitable for a wide range of undergraduate and postgraduate courses, as well as working professionals.

Editorial Review

Review

"This book is a must for anyone seriously committed to research that ensures the authentic participation and empowerment of people from all walks of life, be they from oral or textual traditions, women or men, old or young, articulate or hesitant, outspoken or reserved." – *Farida Akhter, Executive Director, UBINIG (Policy Research for Development Alternative), Dhaka, Bangladesh*

"This exciting and innovative book shows the patterns and processes that connect people and their social, practical and conceptual worlds in action. Its key themes of interdependence, relationship, and the need for dialogue make it a book today for tomorrow's world. It should be on all reading lists as a key resource for developing socially-oriented pedagogies for a more peaceful, productive and interconnected world." – *Jean McNiff, Professor of Educational Research at York St John University, York, UK and author of 'Action Research: Principles and Practice', now in its third edition (Routledge, 2013)*

"...a wonderful compendium, replete with practical tools and techniques that bring rigour and vigour to the international dialogue among action researchers... This is a serious volume worth the time of any action researcher who is curious about how western (including francophone) perspectives on PAR come alive. This volume makes a significant contribution to the collective craft of scholarly-practice among action researchers." – *Hilary Bradbury-Huang, Professor in the Division of Management at Oregon Health & Science University, Portland, USA and Editor of the journal Action Research*

About the Author

Jacques M. Chevalier is Chancellor's Professor Emeritus in the Department of Sociology and Anthropology at Carleton University, Ottawa, Canada.

Daniel J. Buckles is Adjunct Research Professor in the Department of Sociology and Anthropology at Carleton University, Ottawa, Canada, and an independent consultant.

Users Review

From reader reviews:

Christina Bain:

The knowledge that you get from Participatory Action Research: Theory and Methods for Engaged Inquiry may be the more deep you looking the information that hide inside words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Participatory Action Research: Theory and Methods for Engaged Inquiry giving you joy feeling of reading. The article author conveys their point in specific way that can be understood simply by anyone who read that because the author of this e-book is well-known enough. That book also makes your own vocabulary increase well. It is therefore easy to understand then can go with you, both in printed or e-book style are available. We propose you for having that Participatory Action Research: Theory and Methods for Engaged Inquiry instantly.

John Reed:

Information is provisions for those to get better life, information presently can get by anyone from everywhere. The information can be a expertise or any news even restricted. What people must be consider any time those information which is within the former life are hard to be find than now is taking seriously which one works to believe or which one the resource are convinced. If you receive the unstable resource then you get it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Participatory Action Research: Theory and Methods for Engaged Inquiry as the daily resource information.

Richard Bentley:

Reading a e-book can be one of a lot of exercise that everyone in the world likes. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new facts. When you read a book you will get new information simply because book is one of several ways to share the information or maybe their idea. Second, reading through a book will make an individual more imaginative. When you looking at a book especially fictional works book the author will bring someone to imagine the story how the personas do it anything. Third, you could share your knowledge to some others. When you read this Participatory Action Research: Theory and Methods for Engaged Inquiry, you can tells your family, friends and also soon about yours publication. Your knowledge can inspire different ones, make them reading a reserve.

Ruth Barnett:

Precisely why? Because this Participatory Action Research: Theory and Methods for Engaged Inquiry is an unordinary book that the inside of the book waiting for you to snap this but latter it will shock you with the secret it inside. Reading this book adjacent to it was fantastic author who also write the book in such wonderful way makes the content within easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this ever again or you going to regret it. This excellent book will give you a lot of gains than the other book get such as help improving your ability and your critical thinking means. So , still want to postpone having that book? If I were you I will go to the reserve store hurriedly.
