Cognitive Radar: The Knowledge-aided Fully Adaptive Approach (Artech House Remote Sensing Library) By Joseph R. Guerci

Cognitive radar (CR) refers to radar that is capable of interacting intelligently with its environment by adapting both its transmit and receive functions based on contextual awareness and expert reasoning. Chronicling the new field, this cutting-edge resource provides an accessible introduction to the theory and applications of CR, and presents a comprehensive overview of the latest developments in this emerging area. The first book on the subject, this unique volume covers important breakthroughs in advanced radar systems, and offers new and powerful methods for combating difficult clutter environments. Professionals find details on specific algorithmic and real-time high-performance embedded computing (HPEC) architectures. This practical book is supported with numerous examples that clarify key topics, and includes more than 370 equations.

Editorial Review

About the Author

J. R. Guerci is the director of the special projects office at The Defense Advanced Research Projects Agency (DARPA). A Senior Member of the IEEE and a Member of the IEEE Radar Systems Panel, Dr. Guerci earned his Ph.D. in system engineering at the Polytechnic University, New York.

Users Review

From reader reviews:

David Shetler:

What do you consider book? It is just for students because they're still students or it for all people in the world, what the best subject for that? Merely you can be answered for that issue above. Every person has diverse personality and hobby for every other. Don't to be forced someone or something that they don't want do that. You must know how great and also important the book Cognitive Radar: The Knowledge-aided Fully Adaptive Approach (Artech House Remote Sensing Library). All type of book can you see on many solutions. You can look for the internet resources or other social media.

Margaret Soto:

Information is provisions for individuals to get better life, information these days can get by anyone from everywhere. The information can be a expertise or any news even an issue. What people must be consider while those information which is inside former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one the particular resource are convinced. If you get the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All of those possibilities will not happen throughout you if you take Cognitive Radar: The Knowledge-aided Fully Adaptive Approach (Artech House Remote Sensing Library) as the daily resource information.

Phillip Hicks:

Do you have something that you want such as book? The guide lovers usually prefer to pick book like comic, small story and the biggest one is novel. Now, why not attempting Cognitive Radar: The Knowledge-aided Fully Adaptive Approach (Artech House Remote Sensing Library) that give your satisfaction preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the opportunity for people to know world considerably better then how they react when it comes to the world. It can't be explained constantly that reading practice only for the geeky individual but for all of you who wants to always be success person. So , for every you who want to start reading through as your good habit, you are able to pick Cognitive Radar: The Knowledge-aided Fully Adaptive Approach (Artech House Remote Sensing Library) become your starter.

Thomas Rojas:

Book is one of source of know-how. We can add our understanding from it. Not only for students but in addition native or citizen want book to know the upgrade information of year to be able to year. As we know those guides have many advantages. Beside we add our knowledge, can also bring us to around the world. Through the book Cognitive Radar: The Knowledge-aided Fully Adaptive Approach (Artech House Remote Sensing Library) we can take more advantage. Don't someone to be creative people? Being creative person must like to read a book. Just simply choose the best book that suited with your aim. Don't possibly be doubt to change your life by this book Cognitive Radar: The Knowledge-aided Fully Adaptive Approach (Artech House Remote Sensing Library). You can more inviting than now.
