Handbook of Therapeutic Antibodies 3-Volume Set From Wiley-Blackwell

In this most comprehensive reference source for the development, production and therapeutic application of antibodies, Volume I contains general chapters presenting established technologies and clinical applications. Volume II provides a look at emerging technologies, new therapeutic concepts, and clinical studies. The third volume features detailed and specific information about each currently approved type of antibody, including the clinical data. A must-have resource for academic researchers, decision makers in industry and healthcare professionals in the clinic.

Editorial Review

Review

"It is a 'must-have' resource for every scientist dealing with their amazing molecules..." (*Lab Times*, 25th September 2007)

From the Back Cover

The first volume of this most comprehensive reference on the development, production and therapeutic application of antibodies contains general chapters presenting established technologies and clinical applications. Volume II goes on to look at emerging technologies, new therapeutic concepts, and clinical studies, while the third volume features detailed and specific information about each currently approved type of antibody, including the clinical data.

Nearly 100 international experts and researchers from academia, industry, and such regulating bodies as the FDA have contributed their knowledge. This includes the latest information on intellectual property issues hardly available elsewhere, as well as detailed data of relevant studies for clinical applications.

A must-have resource for academic researchers, decision makers in industry and healthcare professionals in the clinic.

From the foreword by Mark Glassy, Chairman & Professor, The Rajko Medenica Research Foundation, and Chief Executive Officer, Shantha West, Inc., San Diego, CA, USA:

"After more than a century of intense analysis, antibodies continue to amaze and inspire. This Handbook of Therapeutic Antibodies is not just an assembly of articles but rather a state-of-the-art comprehensive compendium, which will appeal to all those interested in antibodies, whether from academia, industry, or the clinic. It is an unrivalled resource which shows how mature the antibody field has become and how precisely the antibody molecule can be manipulated and utilized."

Stefan Dübel studied biology at the universities of Mainz and Heidelberg, initially concentrating on developmental biology. From 1989 onwards he carried out pioneering work on antibody phage display and antibody libraries with randomised CDRs. Further work focussed on antibody fusion proteins and improvements of antibody phage display. Currently he is Director of the Department of Biotechnology at the Technical University of Braunschweig and coordinator of the 'Antibody Factory' within the German National Genome Research Network. Stefan Dübel has co-authored a number of textbooks, about 90 publications and 15 patents in the field of recombinant antibodies and phage display.

About the Author

Stefan Dübel got his PhD at the Center for Molecular Biology Heidelberg (ZMBH) and spent his post-doc at the German Cancer Research Center (DKFZ) with research on the development of antibody display libraries. In the following years, he substantially participated in the invention of recombinant antibody phage display technology, as well as other recombinant antibody technologies and the development of various antibody fusion proteins. In 1996, he moved to the University of Heidelberg to establish the antibody engineering group at the Institute of Molecular Genetics. After holding a group leader position at the University of Heidelberg from 1996, Stefan Dübel went to the Biological Faculty of the Technical University of Braunschweig as a full professor in 2002. Here, he currently serves as head of the Department of Biotechnology in Braunschweig and managing director of the Institute of Biochemistry and Biotechnology. He has co-authored more than 90 scientific papers, 17 patents, as well as two acknowledged textbooks in the

field of recombinant antibodies. He is also board member of scientific journals and the biotech industry.

Users Review

From reader reviews:

Stanley Kamp:

Nowadays reading books become more and more than want or need but also get a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge your information inside the book in which improve your knowledge and information. The data you get based on what kind of reserve you read, if you want have more knowledge just go with education and learning books but if you want sense happy read one using theme for entertaining for example comic or novel. The actual Handbook of Therapeutic Antibodies 3-Volume Set is kind of reserve which is giving the reader unstable experience.

Megan Snyder:

A lot of people always spent their very own free time to vacation or maybe go to the outside with them family members or their friend. Do you realize? Many a lot of people spent that they free time just watching TV, as well as playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read the book. It is really fun to suit your needs. If you enjoy the book that you just read you can spent 24 hours a day to reading a reserve. The book Handbook of Therapeutic Antibodies 3-Volume Set it doesn't matter what good to read. There are a lot of people that recommended this book. These folks were enjoying reading this book. In case you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore simply to read this book out of your smart phone. The price is not too costly but this book features high quality.

Wesley Jerkins:

Many people spending their moment by playing outside using friends, fun activity using family or just watching TV the whole day. You can have new activity to enjoy your whole day by reading a book. Ugh, you think reading a book really can hard because you have to take the book everywhere? It okay you can have the e-book, having everywhere you want in your Smartphone. Like Handbook of Therapeutic Antibodies 3-Volume Set which is keeping the e-book version. So , why not try out this book? Let's observe.

Ella Hodge:

What is your hobby? Have you heard that will question when you got scholars? We believe that that query was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person such as reading or as studying become their hobby. You should know that reading is very important and also book as to be the point. Book is important thing to increase you knowledge, except your teacher or lecturer. You get good news or update with regards to something by book. Different categories of books that can you take to be your object. One of them are these claims Handbook of Therapeutic Antibodies 3-Volume Set.
