How to Build Treehouses, Huts and Forts By David Stiles

A treehouse is a wonderful idea, but how in the name of creation do you actually build one? In this delightfully illustrated handbook, David Stiles, the unofficial world grandmaster of the treehouse, shows how.

Not assuming anything about the treehouse builder, Stiles starts with the basics: how to nail, how to buy wood, what kind of screws and nails to use.

Then it's on to an A-frame design so simple that it can be built in a weekend out of four sheets of plywood, followed by lean-tos, a tree hut, and a Tarzan-style jungle hideaway. There are also forts of every description, including a 21-foot-tall lookout tower modeled on one George Washington built to keep an eye on the redcoats.

Stiles also adds a design for a snowball catapult, an igloo and even a Nerf-loaded cannon.

Written for children, with an adult peeking over their shoulder, Stiles's **TREEHOUSES, HUTS, & FORTS** is a dreamer's handbook, offering practical results.
