Hutchison's Beginning Algebra (The Hutchison Series in Mathematics) By Stefan Baratto, Barry Bergman, Donald Hutchison

Elementary Algebra, 8/e by Baratto/Bergman is part of the latest offerings in the successful Streeter-Hutchison Series in Mathematics. The fourth edition continues the hallmark approach of encouraging the learning of mathematics by focusing its coverage on mastering math through practice. This worktext seeks to provide carefully detailed explanations and accessible pedagogy to introduce beginning and intermediate algebra concepts and put the content in context. The authors use a three-pronged approach (I. Communication, II. Pattern Recognition, and III. Problem Solving) to present the material and stimulate critical thinking skills. Items such as Math Anxiety boxes, Check Yourself exercises, and Activities represent this approach and the underlying philosophy of mastering math through practice. The exercise sets have been expanded, organized, and clearly labeled. Vocational and professional-technical exercises have been added throughout. Repeated exposure to this consistent structure should help advance the student's skills in relating to mathematics. The book is designed for a combined beginning and intermediate algebra course, or it can be used across two courses, and is appropriate for lecture, learning center, laboratory, or self-paced courses. It is accompanied by numerous useful supplements, including McGraw-Hill's online homework management system, MathZone.

Editorial Review

About the Author

Stefan began teaching math and science in New York City middle schools. He also taught math at the University of Oregon, Southeast Missouri State University, and York County Technical College. Currently, Stefan is a member of the mathematics faculty at Clackamas Community College where he has found a niche, delighting in the CCC faculty, staff, and students. Stefan's own education includes the University of Michigan (BGS, 1988), Brooklyn College (CUNY), and the University of Oregon (MS, 1996).

Stefan is currently serving on the AMATYC Executive Board as the organization's Northwest Vice President. He has also been involved with ORMATYC, NEMATYC, NCTM, and the State of Oregon Math Chairs group, as well as other local organizations. He has applied his knowledge of math to various fields, using statistics, technology, and web design. More personally, Stefan and his wife, Peggy, try to spend time enjoying the wonders of Oregon and the Pacific Northwest. Their activities include scuba diving, self-defense training, and hiking.

Barry has enjoyed teaching mathematics to a wide variety of students over the years. He began in the field of adult basic education and moved into the teaching of high school mathematics in 1977. He taught high school math for 11 years, at which point he served as a K-12 mathematics specialist for his county. This work allowed him the opportunity to help promote the emerging NCTM standards in his region.

In 1990, Barry began the next portion of his career, having been hired to teach at Clackamas Community College. He maintains a strong interest in the appropriate use of technology and visual models in the learning of mathematics.

Throughout the past 32 years, Barry has played an active role in professional organizations. As a member of OCTM, he contributed several articles and activities to the group's journal. He has presented at AMATYC, OCTM, NCTM, ORMATYC, and ICTCM conferences. Barry also served 4 years as an officer of ORMATYC and participated on an AMATYC committee to provide feedback to revisions of NCTM's standards.

Don began teaching in a preschool while he was an undergraduate. He subsequently taught children with disabilities, adults with disabilities, high school mathematics, and college mathematics. Although each position offered different challenges, it was always breaking a challenging lesson into teachable components that he most enjoyed.

It was at Clackamas Community College that he found his professional niche. The community college allowed him to focus on teaching within a department that constantly challenged faculty and students to expect more. Under the guidance of Jim Streeter, Don learned to present his approach to teaching in the form of a textbook. Don has also been an active member of many professional organizations. He has been president of ORMATYC, AMATYC committee chair, and ACM curriculum committee member. He has presented at AMATYC, ORMATYC, AACC, MAA, ICTCM, and a variety of other conferences.

Above all, he encourages you to be involved, whether as a teacher or as a learner. Whether discussing curricula at a professional meeting or homework in a cafeteria, it is the process of communicating an idea that helps one to clarify it.

Users Review

From reader reviews:

Antonio Haynie:

Now a day those who Living in the era where everything reachable by talk with the internet and the resources included can be true or not need people to be aware of each facts they get. How people have to be smart in getting any information nowadays? Of course the reply is reading a book. Reading through a book can help men and women out of this uncertainty Information mainly this Hutchison's Beginning Algebra (The Hutchison Series in Mathematics) book because book offers you rich facts and knowledge. Of course the info in this book hundred % guarantees there is no doubt in it you probably know this.

Benjamin Aldridge:

This Hutchison's Beginning Algebra (The Hutchison Series in Mathematics) usually are reliable for you who want to become a successful person, why. The main reason of this Hutchison's Beginning Algebra (The Hutchison Series in Mathematics) can be one of several great books you must have is usually giving you more than just simple studying food but feed you with information that probably will shock your earlier knowledge. This book is definitely handy, you can bring it just about everywhere and whenever your conditions throughout the e-book and printed versions. Beside that this Hutchison's Beginning Algebra (The Hutchison Series in Mathematics) giving you an enormous of experience including rich vocabulary, giving you demo of critical thinking that we all know it useful in your day pastime. So , let's have it appreciate reading.

Evelyn Looney:

Why? Because this Hutchison's Beginning Algebra (The Hutchison Series in Mathematics) is an unordinary book that the inside of the book waiting for you to snap it but latter it will jolt you with the secret that inside. Reading this book alongside it was fantastic author who all write the book in such awesome way makes the content interior easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This unique book will give you a lot of positive aspects than the other book possess such as help improving your expertise and your critical thinking technique. So , still want to hold up having that book? If I had been you I will go to the guide store hurriedly.

Aletha Bassett:

Are you kind of busy person, only have 10 or even 15 minute in your morning to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are receiving problem with the book as compared to can satisfy your small amount of time to read it because this all time you only find reserve that need more time to be study. Hutchison's Beginning Algebra (The Hutchison Series in Mathematics) can be your answer given it can be read by anyone who have those short spare time problems.
