My Life with the Chimpanzees By Jane Goodall

From the time she was a girl, Jane Goodall dreamed of a life spent working with animals. Finally she had her wish. When she was twenty-six years old, she ventured into the forests of Africa to observe chimpanzees in the wild. On her expeditions she braved the dangers with leopards and lions in the African bush. And she got to know an amazing group of wild chimpanzees -- intelligent animals whose lives, in work and play and family relationships, bear a surprising resemblance to our own.

Editorial Review

From Library Journal

Noted scientist and conservationist Goodall provides listeners with stories about her life and her experiences studying chimpanzees in Africa. She talks about her first exposure to animals at a farm near her home and how the book Dr. Doolittle helped crystallize her desire. Later Goodall comments on her first trip to the continent and how meeting Dr. Louis Leakey led to her life's work, living among the animals, learning their behaviors, and bringing that information to the rest of the world. Though this tape starts out as an autobiography, it focuses mostly on the work of the Goodall Institute and "Roots and Shoots," organizations created to encourage the protection of animals and their habitats. The author reads her own tale and seems sort of detached even when discussing her interest in saving the world's animals. The book also lacks depth, glossing over Goodall's life and telling her story simply, which could make this tedious listening for adults. For public and school libraries.
