Encyclopedia of Laser Physics and Technology By Rüdiger Paschotta

This authoritative two-volume encyclopedia (A-M, N-Z) helps to master the large variety of physical phenomena and technological aspects involved in laser technology and the wider field of photonics. Besides explaining in detail the physical principles and common techniques of laser operation, it also addresses such supplementary topics as ultrashort pulses, optical communications, optoelectronics, general optics, and quantum optics. References to selected scientific articles and textbooks aid readers in their further studies, and the cross-disciplinary approach makes this four-color encyclopedia of huge benefit to a wide audience in industry, government, and academic research.

Editorial Review

From the Back Cover

This authoritative two-volume encyclopedia helps to master the large variety of physical phenomena and technological aspects involved in laser technology and the wider field of photonics. Besides explaining in detail the physical principles and common techniques of laser operation, it also addresses such supplementary topics as ultrashort pulses, optical communications, optoelectronics, general optics, and quantum optics. References to selected scientific articles and textbooks aid readers in their further studies, and the cross-disciplinary approach makes this encyclopedia of huge benefit to a wide audience in industry, government, and academic research.

About the Author

Rüdiger Paschotta is an internationally recognized expert in areas such as lasers and amplifiers, nonlinear optics, fiber technology, ultrashort pulses, and noise in optics. He originally gained this expertise during a successful academic career, and later founded RP Photonics Consulting, providing services to companies within the photonics industry mostly in Europe and the United States. Dr. Paschotta thus combines the detailed expertise of a scientist with the practical sense of someone working mainly on industrial projects.

Users Review

From reader reviews:

Deborah Brantley:

Reading can called mind hangout, why? Because while you are reading a book especially book entitled Encyclopedia of Laser Physics and Technology your brain will drift away trough every dimension, wandering in most aspect that maybe mysterious for but surely will become your mind friends. Imaging every single word written in a book then become one form conclusion and explanation this maybe you never get previous to. The Encyclopedia of Laser Physics and Technology giving you a different experience more than blown away your head but also giving you useful info for your better life in this particular era. So now let us present to you the relaxing pattern at this point is your body and mind will be pleased when you are finished examining it, like winning a casino game. Do you want to try this extraordinary paying spare time activity?

Denise Lee:

Do you have something that you enjoy such as book? The reserve lovers usually prefer to pick book like comic, brief story and the biggest an example may be novel. Now, why not seeking Encyclopedia of Laser Physics and Technology that give your fun preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the opportunity for people to know world considerably better then how they react in the direction of the world. It can't be explained constantly that reading practice only for the geeky person but for all of you who wants to possibly be success person. So , for all of you who want to start examining as your good habit, you are able to pick Encyclopedia of Laser Physics and Technology become your own starter.

Amy Mueller:

A lot of book has printed but it is unique. You can get it by online on social media. You can choose the very best book for you, science, comedy, novel, or whatever through searching from it. It is identified as of book Encyclopedia of Laser Physics and Technology. You'll be able to your knowledge by it. Without leaving the printed book, it can add your knowledge and make anyone happier to read. It is most significant that, you must aware about reserve. It can bring you from one destination to other place.

May Chapa:

What is your hobby? Have you heard which question when you got scholars? We believe that that query was given by teacher to the students. Many kinds of hobby, All people has different hobby. And you also know that little person including reading or as studying become their hobby. You need to understand that reading is very important in addition to book as to be the matter. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You get good news or update concerning something by book. Many kinds of books that can you go onto be your object. One of them is Encyclopedia of Laser Physics and Technology.
