The Boy Who Loved Math: The Improbable Life of Paul Erdos By Deborah Heiligman

Most people think of mathematicians as solitary, working away in isolation. And, it's true, many of them do. But Paul Erdos never followed the usual path. At the age of four, he could ask you when you were born and then calculate the number of seconds you had been alive in his head. But he didn't learn to butter his own bread until he turned twenty. Instead, he traveled around the world, from one mathematician to the next, collaborating on an astonishing number of publications. With a simple, lyrical text and richly layered illustrations, this is a beautiful introduction to the world of math and a fascinating look at the unique character traits that made "Uncle Paul" a great man.

Editorial Review

From [Booklist](#)

Starred Review Though eccentric mathematician Paul Erdos might seem an unusual subject for a picture book, his story makes for a memorable biography. Growing up in Hungary during WWI, Erdos tried school but chafed at the rules and convinced his mother that he should study at home. He was fascinated by numbers from an early age, and by the time he was 20, he was known as The Magician from Budapest. Unable to do common tasks such as cooking, laundry, or driving, he spent his adult life flying around the world, staying with other mathematicians, and working collaboratively on challenging math problems. Math is woven into the lively writing (Mama loved Paul to infinity. Paul loved Mama to 8, too!). The wonderfully vivid artwork, where ideas from the text are clarified, also uses decorative elements to support the idea that Erdos saw the world differently—numerically. Heiligman appends a lengthy note about writing the book, while Pham offers a more extensive note on creating the illustrations, in which she comments on the mathematical ideas and mathematicians depicted in the art. This excellent picture-book biography celebrates a man little known outside his field, but one well worth knowing. Grades K-3. --Carolyn Phelan

Review

“Erdos's unconventional brilliance shines through on every page, and extensive author and illustrator notes (including Pham's explanations of the mathematical concepts she works into each illustration) will delight readers with even a fraction of Erdos's interest in math.” *?Publishers Weekly, starred review*

“*An exuberant and admiring portrait introduces the odd, marvelously nerdy, way cool Hungarian-born itinerant mathematical genius.” *?Kirkus Reviews, starred review*

“An infinitely creative and entertaining book.” *?The Horn Book*

“Pair this with Don Brown's *Odd Boy Out* (BCCB 10/04) to compare genius eccentricities, or hand it to middle-grade lovers of math puzzles--opened to the notes.” *?BCCB*

About the Author

Deborah Heiligman has written numerous books for young readers, including *Charles and Emma: The Darwins' Leap of Faith*, a National Book Award finalist. She lives in New York City.

LeUyen Pham has illustrated dozens of books for kids, including *God's Dream* by Archbishop Desmond Tutu, *Freckleface Strawberry* by Julianne Moore, and her own *Big Sister, Little Sister*.

Users Review

From reader reviews:

Ethel Ellis:

In this 21st hundred years, people become competitive in each and every way. By being competitive at this point, people have do something to make these people survives, being in the middle of the actual crowded

place and notice simply by surrounding. One thing that occasionally many people have underestimated the item for a while is reading. Yes, by reading a reserve your ability to survive boost then having chance to stand up than other is high. For yourself who want to start reading the book, we give you this specific The Boy Who Loved Math: The Improbable Life of Paul Erdos book as beginning and daily reading reserve. Why, because this book is more than just a book.

Steve Diaz:

Are you kind of occupied person, only have 10 or 15 minute in your moment to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your short period of time to read it because all of this time you only find guide that need more time to be examine. The Boy Who Loved Math: The Improbable Life of Paul Erdos can be your answer since it can be read by a person who have those short spare time problems.

Fred Prentice:

Reading a book for being new life style in this year; every people loves to read a book. When you go through a book you can get a great deal of benefit. When you read books, you can improve your knowledge, due to the fact book has a lot of information into it. The information that you will get depend on what forms of book that you have read. In order to get information about your study, you can read education books, but if you act like you want to entertain yourself read a fiction books, these kinds of us novel, comics, as well as soon. The The Boy Who Loved Math: The Improbable Life of Paul Erdos provide you with new experience in reading a book.

Andy McNeil:

Don't be worry for anyone who is afraid that this book can filled the space in your house, you might have it in e-book means, more simple and reachable. This specific The Boy Who Loved Math: The Improbable Life of Paul Erdos can give you a lot of friends because by you looking at this one book you have thing that they don't and make you more like an interesting person. This specific book can be one of one step for you to get success. This publication offer you information that might be your friend doesn't learn, by knowing more than some other make you to be great people. So , why hesitate? Let us have The Boy Who Loved Math: The Improbable Life of Paul Erdos.
